

NATS, Prestwick

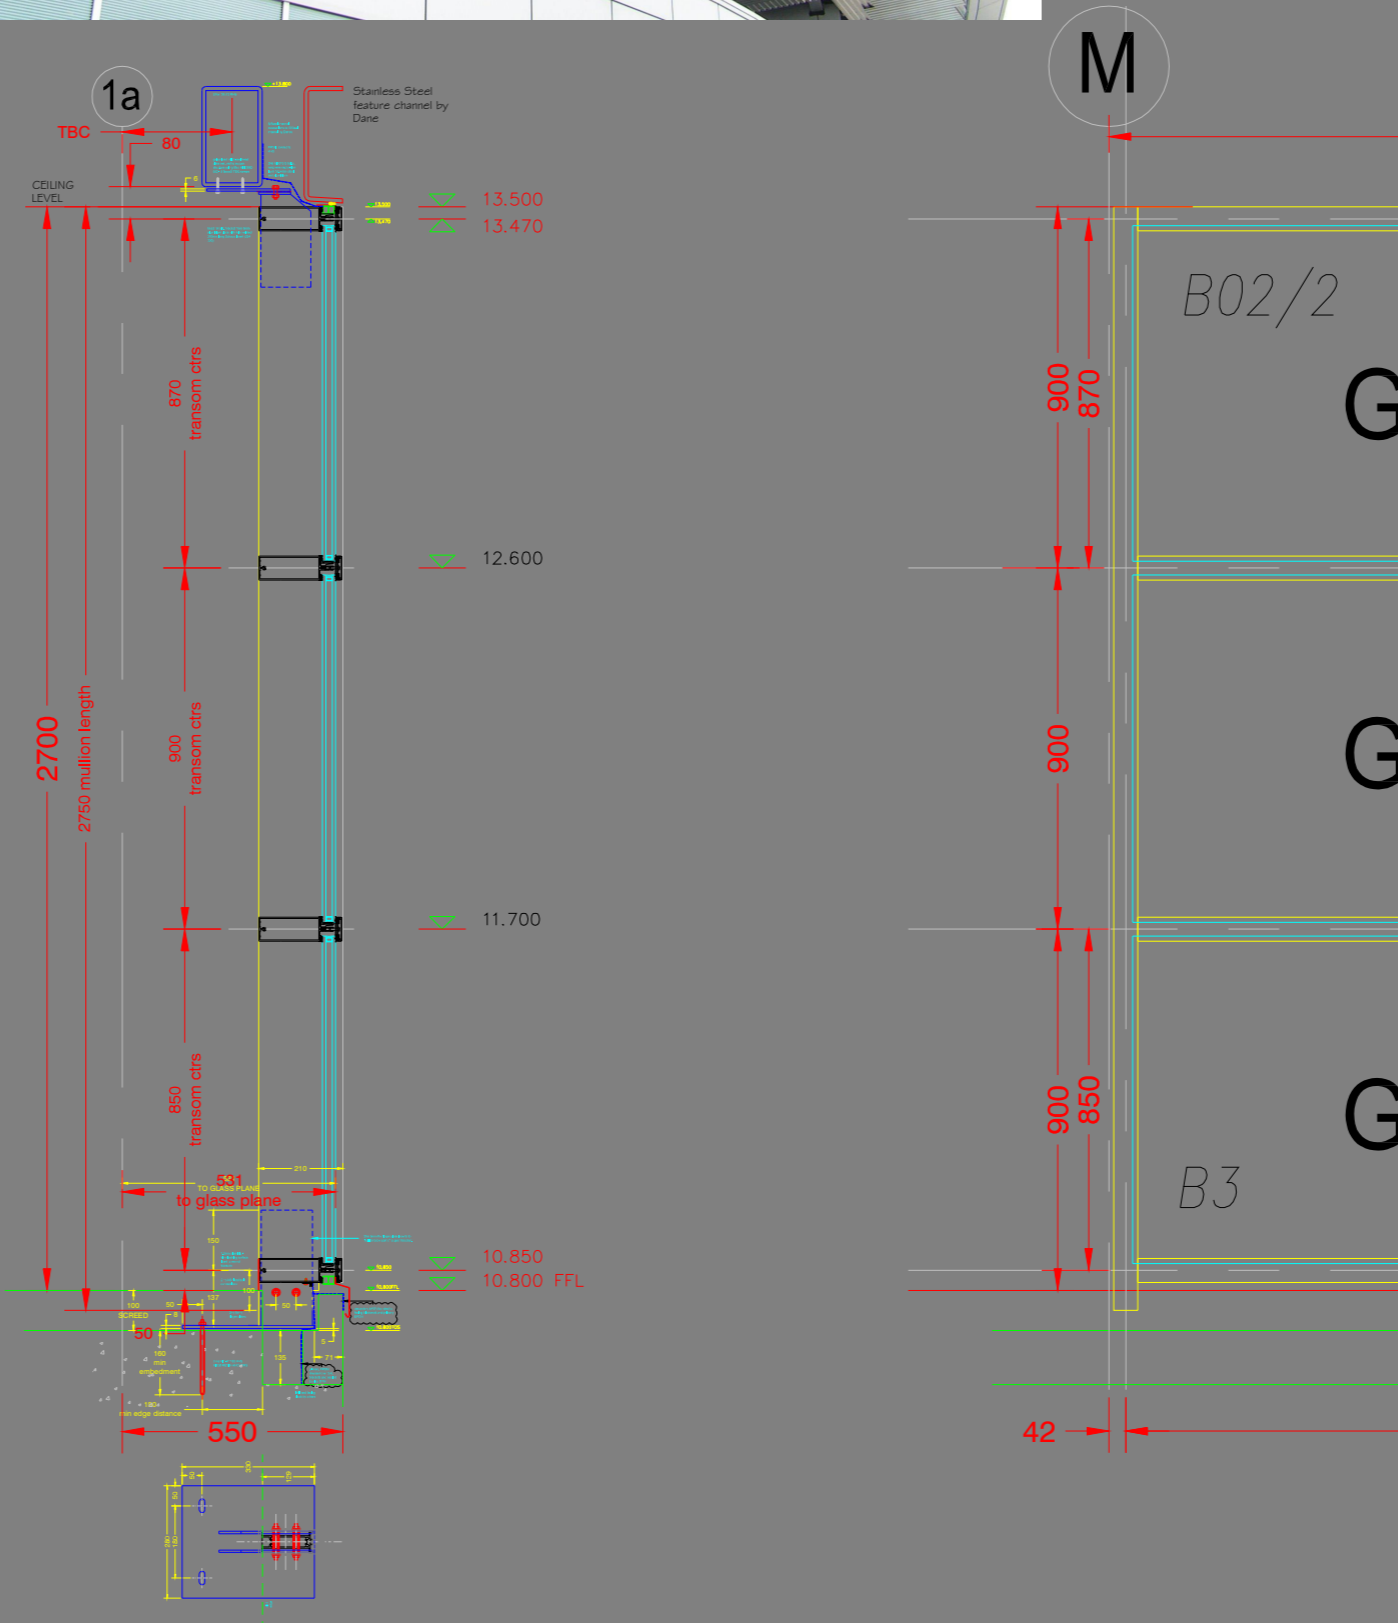

External envelope detailing

CMM were employed by specialist cladding glazing contractor Systems Aluminium on this high performing and technically demanding project at the NATS facility at Prestwick.

Our brief was to produce full, working drawings for the complex cladding, curtain walling and roof glazing systems.

The production phase of the project required more than 300 working drawings to be derived from CMM's 3D AutoCad models. Schedules of components and secondary steelwork dimensional coordination.
